

This plane is a scaled-down version of the Veritas® Router Plane. It features a 0.120" wide A2 tool steel blade with working depth adjustment. The blade may be clamped in either the forward position for general use or at the back for bullnose work. The body is investment cast stainless steel, the turned components are stainless steel, the locking collar is anodized aluminum, and the knobs are bubinga.

### Blade Sharpening

The A2 tool steel blade is best sharpened on a water stone. Hone the bevel and lap the bottom.

*Note: A corrosion-inhibiting paperboard chip is included in the case. It will provide continuous corrosion protection for up to two years.*

### Accessories

**05P82.02** Replacement Blade
